## Who I Am

---

A passionate and hard-working Software Engineer with over 5 years of experience looking to expand my skills with challenging new experiences. I take pride in writing clean, documented code, collaborating with others, and working well under pressure.

## Education

---

- |             |                                  |
|-------------|----------------------------------|
| High School | Loudoun County High School       |
|             | – 3.9 GPA, 1260 SAT              |
| College     | Virginia Commonwealth University |
|             | – CS Major (Partial Completion)  |

## Experience

---

- |                            |  |
|----------------------------|--|
| <b>Full-Stack Engineer</b> | Worked efficiently in a fast-paced startup environment as a top contributor in a tight-knit, international team. |
| Press Hook                 | – Wrote clean, documented code.  |
| 2021-Present               | – Tracked tickets with JIRA and pushed code with Git (GitHub).   |
|                            | – Architected and Implemented real-time messaging.   |
|                            | – Led an effort to improve front-end experiences with React.   |
|                            | – Assisted with screening and interviewing candidates.   |
|                            | – Participated in daily standups.  |
|                            | – Implemented CI/CD tasks with GitHub Actions.   |
|                            | – Python, JavaScript, React, HTML5, CSS, WebSockets.   |

- |                                     |   |
|-------------------------------------|---|
| <b>Volunteer Software Developer</b> | Worked with talented, international developers to provide an interactive and engaging experience for thousands of concurrent viewers while raising money for charity. |
| Kinstone, LLC                       | – Built highly custom, high-stability software designed for live use.   |
| (Zeldathon.com)                     | – Utilized Twitch/3rd Party APIs  |
| 2016-2022                           | – Worked with other developers for integration with other projects.   |
|                                     | – JavaScript, TypeScript, React, HTML, CSS  |

## Skills

---

### Software Engineering

- JavaScript
- Python
- Java
- Web Development
- HTML5/CSS
- React/Others
- WebSockets
- Networking
- RESTful APIs
- SQL
- Architecture
- Docker
- Cloud Deployments
- Heroku
- AWS
- Troubleshooting
- Testing/QA

### Interpersonal

- Agile
- Skill Building
- Problem Solving
- Collaboration and Leadership
